Search & Replace XT

comfortable search and replace by userdefined macros

Search & Replace is an XTension for QuarkXPress designed for those who regularly receive text which needs to be “cleaned up”. Featured with a floating palette where you can add each of your set ups (or macros) for fast and easy access. You can set up to perform multiple search and replace functions i.e. eliminating all spaces followed by a period, then all spaces followed by a comma or to search for double spaces.
