Features

Suitcase Fusion™ 3 is the creative professional's font manager

- Complete control over your fonts – desktop and the web
- Powerful preview technologies
- WebINK enabled for web fonts
- There when you need it, the Suitcase Fusion Core™ runs in the background, for critical activation and deactivation
- Built using Universal Type Server™ technology
- Available for Macintosh® or Windows®

Reliable Auto-activation

Focus on your work, not your system. Suitcase Fusion 3 comes with professional-grade auto-activation plug-ins for critical design and publishing apps.

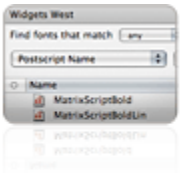
- Auto-activation plug-ins for Adobe® InDesign® and Illustrator® CS5/4/3, Photoshop® CS5/4 (coming soon) and QuarkXPress® 8/7
- Application Sets activate fonts whenever you launch selected apps.
- Automatically activates exact type faces for leading applications*
- Automatically activates fonts in linked or embedded objects*
- Automatically deactivates fonts when a document is closed*
- Uses patented Font Sense™ technology to ensure exact font matches and precise auto-activation*
- Easily control global auto-activation preferences for each application

*Available in plug-in based auto-activation only.

Powerful Interactive Previews

Suitcase Fusion 3 gives you unprecedented font preview options. Preview any text using any font. See how typefaces stack up side-by-side, even down to their individual glyphs. Tear off floating previews or take Font Snapshots to preview your fonts in action.

- Drag-and-drop preview text onto any live document with Floating Previews
- Encoding-aware previews shows all native characters in a particular font face
- Zoom Slider dynamically adjusts preview type size on-the-fly
- Glyph View lets you see all characters supported by a selected font
- Font Snapshots quickly save preview text to PNG files
- Create print sample pages of any previewed font
- View and compare any type faces side-by-side before activating
- Preview fonts in Waterfall, ABC123, Paragraph or dynamically in QuickType™
- Select, activate and export fonts from Preview Pane



Locate Fonts Fast

What good is a font if you can't find it when you need it? Suitcase Fusion 3 makes it easy to locate the right font at the right time.

- QuickFind performs fast, dynamic searches as you type
- QuickMatch technology locates similar fonts fast
- Search on any metadata field (style, keywords, classifications, etc.)
- Perform fast, multi-level searches
- Automatically populates font metadata, such as style, classification

and foundry

Secure Font Storage

Rest easy that your fonts are safe from corruption or unintentional deletion.

- Font Vault provides centralized repository for easy access
- Easy back-up and restore
- Separates families into individual typefaces for precision and control
- Option to create multiple libraries within Font Vault for additional precision
- Font Vault is portable for easy transfer to other machines

Font Corruption is in Check

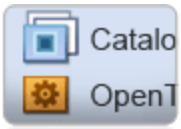
Problem fonts can disrupt even the most efficient workflow. Suitcase Fusion 3 keeps your font collection clean and your workflow smooth.

- Built-in font corruption detection and repair
- Identifies corruptions, “incomplete,” and problematic fonts before they are added to your font collection
- Clears problematic font caches (Mac® only)
- Ensures stable font environment
- Eliminates font corruptions and conflicts
- Repairs corrupt fonts when possible

FontDoctor™ utility

FontDoctor provides additional corruption detection and organization features, and is FREE with every copy of Suitcase Fusion 3.

- Adds additional level of font corruption detection and repair
- Generates detailed reports about bad fonts
- Automatically organizes and optimizes font library



Customized Font Sets

Suitcase Fusion 3 helps you stay organized. Create sets of fonts by project, type or however best suits your workflow.

- Similar to Playlists in iTunes®
- Provides easy way to sort fonts to quickly find and active them
- Create your own custom font sets to fit your workflow
- Create a set of all your document’s fonts directly from your document
- Nested sets (sub sets) provide even more organizational options

Smart Sets will automatically add fonts based on any metadata you select.

WebINK Enabled

Bring gorgeous typography to the web using Suitcase Fusion 3 and the WebINK web font rental service. WebINK is the best way to easily integrate web fonts into any site without worrying about all of those pesky browser compatibility and font licensing issues.

- Browse the huge selection of quality web fonts from WebINK
- Preview WebINK fonts using Suitcase Fusion’s interactive font preview modes
- Preview fonts in any website without writing a single line of code
- Manage your web font collections in Type Drawers
- Easily transfer web fonts to clients upon job completion
