

UniConv 3 XTn

converting utility for QuarkXPress

This XTension provides basic functions for the conversion program UniConv3 for direct access in QuarkXPress. With this XTension you can easily convert your XPress files, and we help you with a growing number of conversion routines. Now you can also use the installed XTND-Filter also in your preferred layout program. Even footnotes are not lost and, but are converted in a separate file. From which they can be imported into QuarkXPress. And if you have a special problem, the developer is happy to provide a custom fit.
