- XPert ItemStyles
- XPert Layers
- XPert PageSets
- XPert Paste
- XPert Pilot
- XPert Print
- XPert Scale
- XPert TextLink
- XPert Toolbars
- XPert Type

XPert Align

Align items with other items or the page.

XPert BoxTools

Ease the process of adjusting the size and placement of items, text, and graphics.

XPert FindChange

Gain comprehensive control for finding any type of item.

XPert Guides

Create and edit on-screen guides with precise control.

XPert ImageInfo

Access information about pictures and the capabilities for modifying pictures placed in QuarkXPress projects.

XPert ItemStyles

Save item attributes such as color, frame style, line width, picture scale, and text inset as style sheets that you can apply to any item from a palette.

XPert Layers

Locate, select, and modify items by layer and work with QuarkXPress items easily.

XPert PageSets

Save settings in the New Document dialog box as a style.

XPert Paste

Paste an item to the same X-Y coordinates of the original on a different page or spread.

XPert Pilot

See thumbnail previews of pages and spreads in an open project so you can instantly jump to an area you need to work on without knowing what page it is on.

XPert Print

Print or export QuarkXPress pages and spreads as EPS files.

XPert Scale

Scale QuarkXPress documents, items, groups, and contents, similar to the way drawing programs scale objects.

XPert TextLink

Use an intuitive palette to link and unlink text boxes and text paths.

XPert Toolbars

Create custom palettes for quick access to any QuarkXPress function.

XPert Type

Access common text formatting options quickly and make changes by dragging and dropping or clicking arrows.
